Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 22-37, drawn to a sulphonate, classified in class 504, subclass 349+.
- II. Claims 27-37, drawn to a phenate, classified in class 504, subclass 314+
- III. Claims 27-37, drawn to an alkyl amine, classified in class 504, subclass 148+.

Inventions I and II and III are distinct, because inventions require a separate search.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications restriction for examination purposes as indicated is proper. In addition, during the 371 prosecution, a lack of unity of invention was declared.

Election Requirement

This application contains claims directed to the following patentably distinct species of the claimed invention: Numerous agricultural spray compositions.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a spray oil having an oil basic compound that is selected from a sulphonate or phenate or alkylamine is generic. In the election, the applicant should elect one specifically named compound from the group elected (sulphonate or phenate or alkyl amine). In addition, a specifically named single disclosed UV deactivator must elected.

Art Unit: 1616

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. G. Shekleton to request an oral election to the above restriction requirement, but did not result in an election being made.
